KUARTE

# Find a nail tech you can *trust.*

How KuArte works: a booking website that connects customers with nail technicians in Panabo City, built on verified work, real reviews and safer home service.

**Concept explainer** · November 2026

Prototype screens and all names, prices and numbers are sample data

01 · WHY KUARTE

# Finding a nail tech runs on DMs and guesswork

In Panabo City, most nail techs work from home or small salons and get clients through Facebook, Instagram and word of mouth. That works until something goes wrong, and both sides carry the risk.

### *"Is this really her work?"*

Portfolios are screenshots and reposts. Customers can't tell who actually did a set.

### *"Hm po?"*

Every price starts a back-and-forth in Messenger, and times are agreed in chat with nothing holding the slot.

### *"She never showed up."*

No-shows hit both sides. Techs lose a slot and materials; customers lose an afternoon. Nobody can prove who was late.

### *"A stranger in my home."*

Home service is popular and convenient, but neither the tech nor the customer knows who is on the other side of the door.

THE IDEA

## Facebook and Instagram help you *find* a nail tech. KuArte helps you *trust* one.

**1**

### Verified photos

Taken in KuArte at a real, completed booking, with time and place recorded. Uploads are allowed but labelled Unverified.

**2**

### Reference vs result reviews

Only completed bookings can be reviewed. Each review shows the photo the customer brought next to the finished set.

**3**

### Check-in on both sides

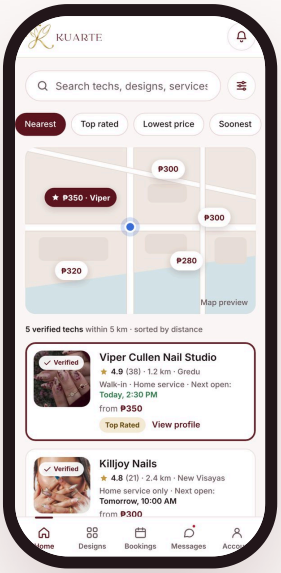

"On my way" and "I'm here" with browser location. The records decide no-show refunds without anyone arguing.

| Panabo City | Two sides | Free to join | Commission + boosts |
|---|---|---|---|
| Launch area, then nearby cities | Customers and nail techs (solo or salon) | For techs and customers | How KuArte earns |

02 · FOR CUSTOMERS

# Find, compare, book, show up, review

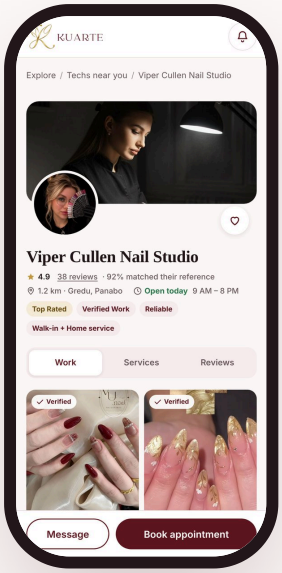

Five steps from "I want my nails done" to a review that helps the next person choose. Guests can book walk-in appointments with a phone number; home service needs an account.

STEP 1

## Find

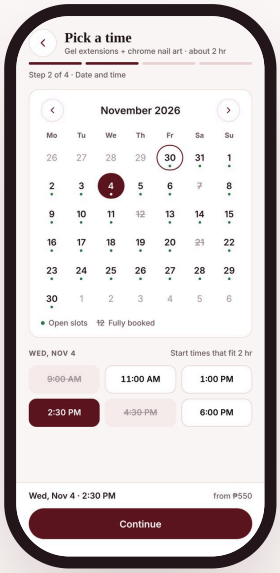

Search by service or browse the design feed. Techs are sorted by distance, with filters for price, walk-in or home service, rating and open today.

STEP 2

## Compare

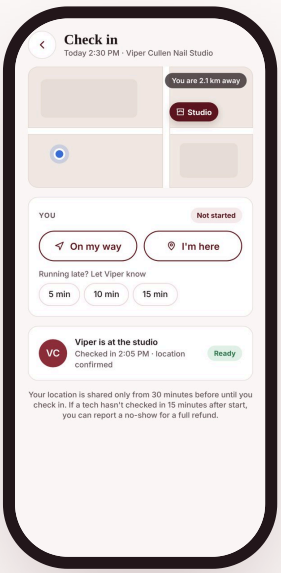

Each profile shows Verified work, badges earned on KuArte, "starts at" prices and how often the result matched the customer's reference.

STEP 3

## Book

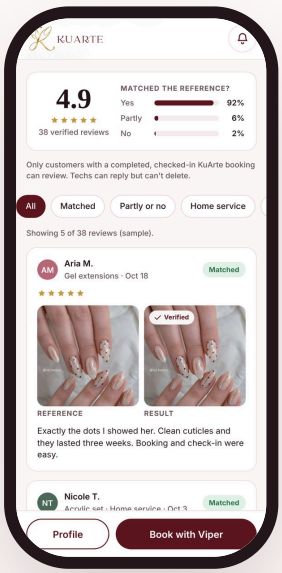

Pick a service and a mode, attach a reference photo, choose an open slot, and pay a deposit if the tech asks for one. Both sides confirm.

STEP 4

## Show up

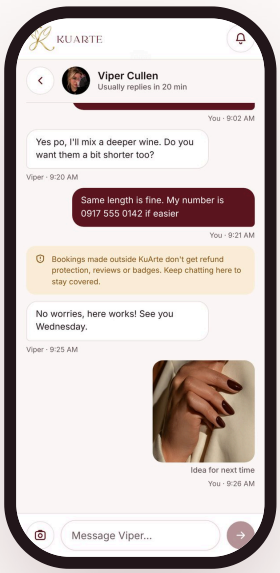

Check-in opens 30 minutes before. Location is shared only for that window, and chat keeps every detail in one place.

STEP 5

## Review

The tech enters the final price and takes a result photo. The customer confirms the price and reviews: stars, text and "matched my reference?"

ANY TIME

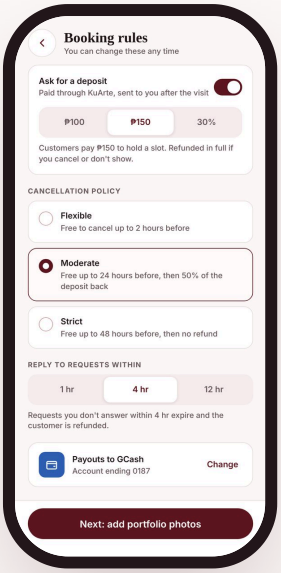

## Chat

One thread per customer and tech, tied to the booking. Sharing a phone number gets a gentle reminder that off-platform bookings lose their protection.

03 · FOR NAIL TECHS AND SALONS

# A record worth more than a Facebook page

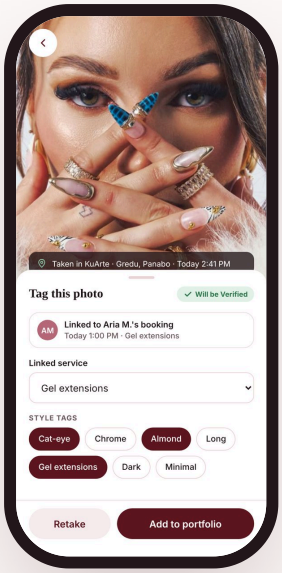

Signing up is free, and commission only applies to bookings KuArte brings in. A salon uses the same flows as one business account.

SET UP

## Profile and booking rules

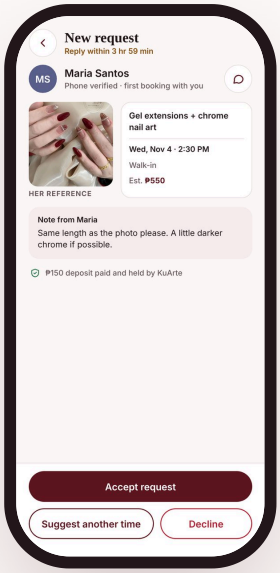

Service menu with "starts at" prices, walk-in and home service switches, an optional deposit, a cancellation preset and how fast they reply.

PORTFOLIO

## Verified photos

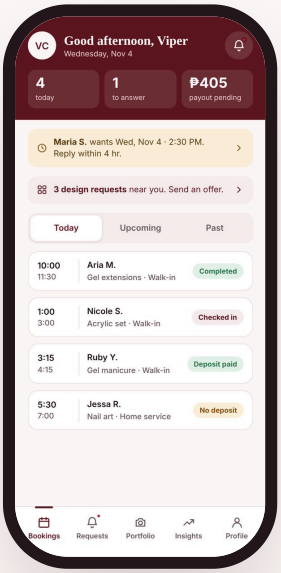

Photos taken in KuArte at a completed booking are tagged by style and linked to a service, so they show up in the design feed with a Book button.

REQUESTS

## Accept, decline or suggest

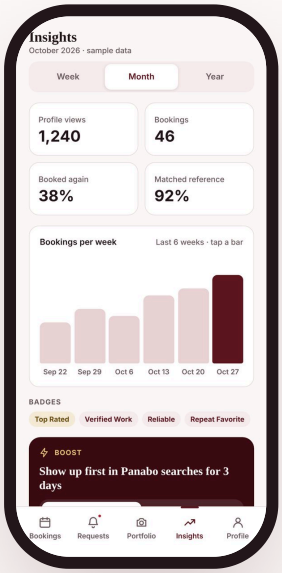

A request shows the service, reference photo, mode, time and the customer's KuArte record. Unanswered requests expire and refund the customer.

DAY TO DAY

## Dashboard

Today, Upcoming and Past, with deposits, check-in status and design requests nearby. Completing a booking releases the deposit, minus commission.

GROW

## Insights, badges, boosts

Profile views, bookings, repeat customers and badges by week, month or year. Boosts put a tech first in local searches, labelled Sponsored.

## Badges are earned, never bought

**Verified Work**

10+ Verified photos

**Reliable**

20+ bookings, no tech no-shows, under 5% tech cancellations

**Top Rated**

4.7+ across 25+ reviews

**Repeat Favorite**

30%+ of customers book again

**New on KuArte**

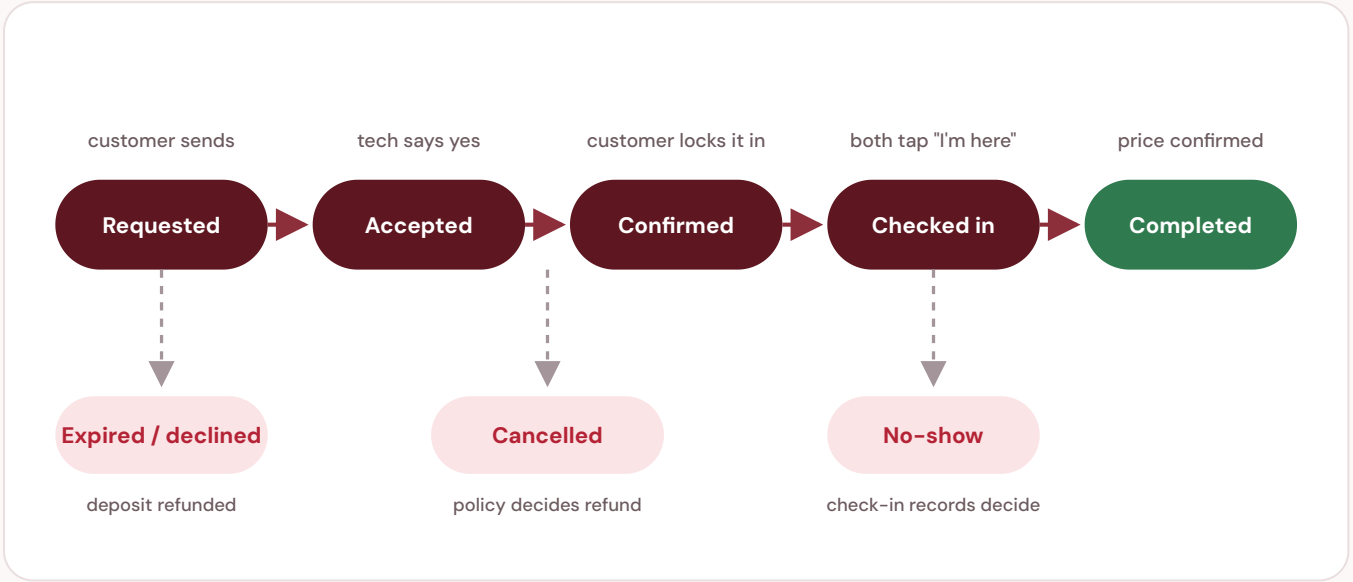

First 30 days, or under 5 bookings

Proposed thresholds, to test with techs.

04 · HOW A BOOKING MOVES

# Both sides confirm. Check-ins settle the rest.

Every booking passes through the same states, and the prototype uses them as its status labels. It can leave the main path at four points.

## No-shows and lateness

| SITUATION | WHAT CHECK-IN SHOWS | OUTCOME |
|---|---|---|
| **Tech doesn't arrive** | No tech "I'm here" 15 min after start | Full refund to the customer; strike on the tech's record |
| **Customer doesn't arrive** | No customer "I'm here" 15 min after start | Tech keeps the deposit |
| **Customer not home** | Tech checked in near the address, customer silent 15 min | Tech keeps the deposit |
| **Running late** | "On my way" tapped, still moving | Late side sends "running X min late"; the other side waits or cancels without penalty |
| **Both say they arrived** | Conflicting check-ins | KuArte support reviews both location records and the chat |

### Cancellation presets

Each tech picks Flexible (free up to 2 h before), Moderate (24 h, then 50% back) or Strict (48 h, then none). A tech cancelling always refunds in full.

### Deposits

Optional and set by each tech, paid through KuArte with GCash or Maya and held until the visit. Paid out after completion, minus commission.

### Bad set

The customer reports within 24 hours with a photo. The tech offers a free fix or a partial refund; if they can't agree, KuArte decides.

05 · TRUST AND SAFETY

# Trust is the product

Every system exists to make a tech's record on KuArte worth more than their social media, and to make home service safe enough to offer.

## Reviews compare the reference with the result

One review per completed booking, with stars, text and "Matched my reference: yes, partly or no". The matched rate shows on the profile. Techs can reply once but can't delete.

## A Verified photo proves three things

- **Who:** it's linked to a booking the customer confirmed.
- **Where and when:** the in-app camera records location and time.
- **That it's real work:** uploads are allowed but labelled Unverified, and customers can filter them out.

## Home service is gated harder than walk-in

### Before

Customers need an account with a verified phone and a profile photo. The exact address is shared only after both confirm, and the tech sees the customer's KuArte record first. Techs set their area and can decline without penalty.

### During

On "I'm here", the customer sees the tech's photo and name to match at the door. Either side can share the booking with a trusted contact. Location sharing stops at completion.

### After

Techs rate customers privately. A safety report or repeated low ratings pause home-service booking until a person reviews it. Safety reports always go to a person.

NEED HELP

### The Need help button

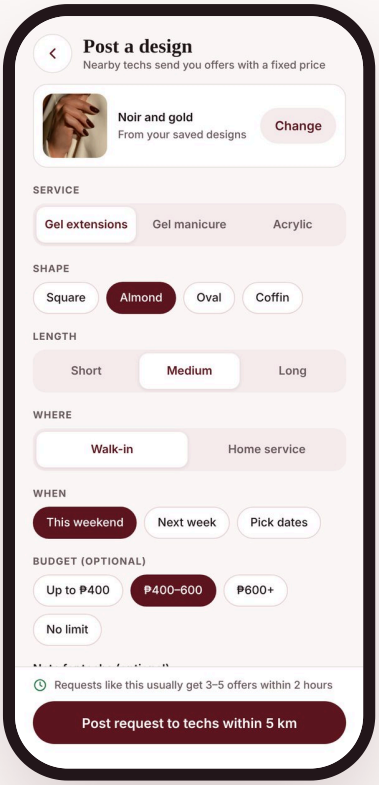

Stays on the booking from check-in to completion. One tap calls 911, and the screen shows the barangay hall and the nearest Panabo City police station for that address, with a ready-to-share summary of who, where and when. A real launch needs a formal arrangement with the police and the barangays covered.

**Ease of use first:** the MVP has no ID checks for techs. ID verification, required deposits and a Data Privacy Act plan switch on at the real launch date.

06 · PHASE 2

# Post a design, get offers

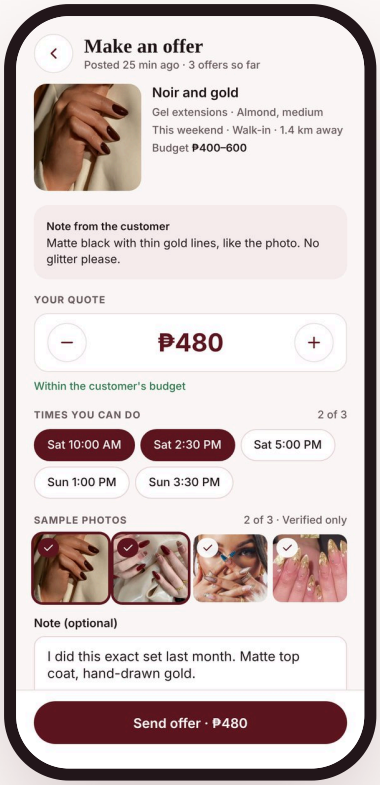

Discovery flipped around: the customer posts the look they want and nearby techs reply with a fixed price. It ends the "hm po?" back-and-forth and shows techs real demand.

CUSTOMER

## Post the design

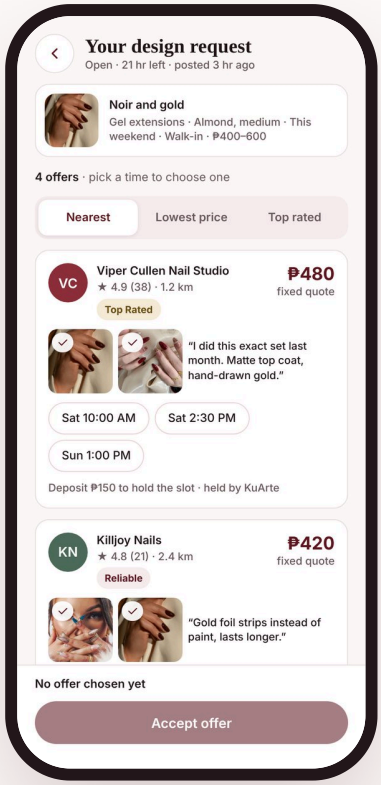

Add the photo, shape and length, walk-in or home service, an optional budget and a date window. It goes to techs within 5 km whose style tags match, for 24 hours.

NAIL TECH

## Make an offer

A fixed quote, up to 3 open times and up to 3 photos of similar Verified work. Techs never see each other's prices, and no customer name shows until a booking exists.

CUSTOMER

## Compare and accept

Offers sort by distance, price or rating. Picking a time and paying the deposit confirms the booking straight away, and the other offers close.

## Rules (proposed)

- The quote is the price; any change needs the customer's confirmation.
- Up to 10 offers per request, first come first served.
- Every offer includes at least one Verified photo.
- Offers are free at launch; a weekly cap and a Pro plan come later.

## Risks

- **Empty requests** kill trust fast: turn it on only once about 30 techs are active in Panabo City, and show "usually gets X offers".
- **A price race:** hidden prices between techs, and rating and Verified work beside each price, keep it about quality.

# No cost to techs until they earn

Signing up is free for techs and customers. KuArte earns when a booking it brought in is completed, and when techs choose to promote themselves.

NOW

### Commission

A percentage of the final price, taken from the deposit payout or the tech's prepaid KuArte wallet. 10% is the starting assumption to test with techs.

NOW

### Boosts

Techs pay to rank first in local searches or feature a photo in the design feed for 3 or 7 days, always labelled Sponsored. Pricing is set after tech interviews.

LATER

### Pro plan

A monthly fee for lower commission, deeper insights and multi-tech salon tools, with more design-request offers per week.

## Why techs pay

Commission only applies to bookings KuArte brings in. Deposits protect them from no-shows, a cost they absorb today.

## Why customers stay

Reviews, refund protection and booking history only exist on KuArte.

### Cold start: techs first

Recruit 20–30 techs in Panabo City, free of commission for their first month, and help them load their portfolios. Then reach customers through those techs' own followers and local Facebook groups.

## How KuArte grows

NOW

### Launch in Panabo City

Techs first, then customers. Search and the design feed, booking with optional deposits, check-in, chat and reviews with reference vs result photos.

PHASE 2

### More ways to book

Post a design and get offers. Salon accounts that manage several techs, each with their own portfolio and calendar. Paying the full price through KuArte.

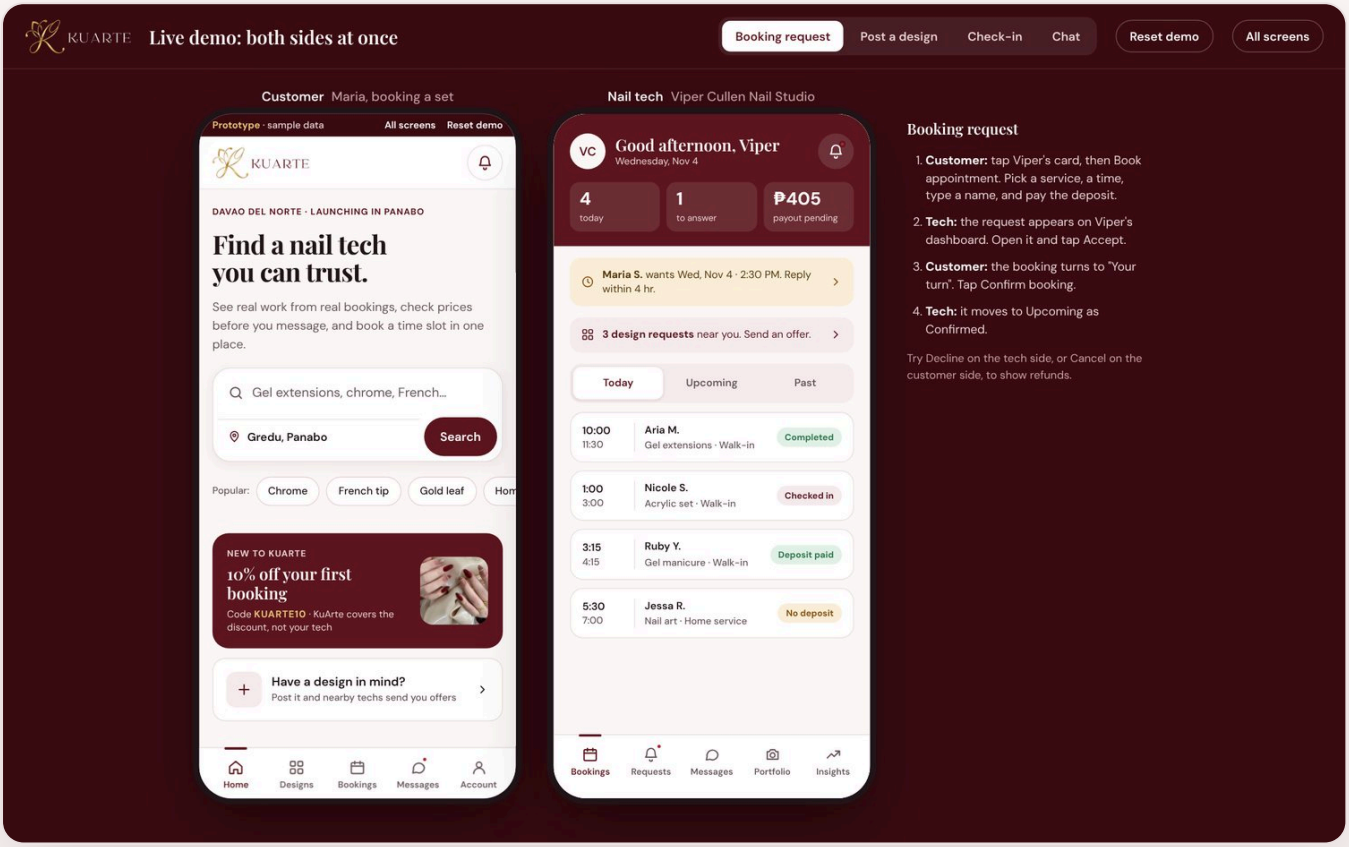

REAL LAUNCH

### Before going public

Required deposits on every booking, ID verification for techs (home service first), and a Data Privacy Act plan for IDs and location data.

# Click through it, or watch both sides at once

A responsive website that adapts to phones, tablets and laptops. The live demo shows the customer's and Viper's phones side by side: what one side does appears on the other straight away.

DEMO 1

### Booking request

Book on the customer phone, accept on Viper's, confirm on the customer's. Cancel or decline to show refunds.

DEMO 2

### Post a design

Post a request, send a quote from Viper's side, then accept it as the customer.

DEMO 3

### Check-in

Tap On my way, Running late and I'm here as the customer. Viper's dashboard updates each time.

DEMO 4

### Chat

Send a message on one phone and reply on the other. A phone number triggers the stay-on-KuArte reminder.

## Works in the prototype

- Search, filters, map pins and the design feed
- Tech profile, reviews and one page per design
- The full booking flow, check-in and reviews; a posted review shows on the profile
- Nail tech settings: switches, deposit, reply window, linked services, breaks, insights and boost length

## Coming soon, or before a real launch

- Photo upload, the in-app camera, editing services, payout changes, rescheduling, account settings
- Sync across devices (the demo syncs within one browser)
- Required deposits, ID checks and a Data Privacy Act plan
- A formal Need help arrangement with the police and barangays
